

Level Seven Individuation

For several months before the initiation, saturate your brain with illustrations and explanations of evolution into human form. Any good scientific text on the subject will do, any credible website or documentary.

Before the initiation, read a good description of the seventh circuit postulated by Timothy Leary and how it is usually activated. A little ceremony may circumvent or enhance the usual methods of seventh circuit triggering.

The temple altar is a cardboard box with any picture of DNA taped to the surface.

The temple is to be a small, dimly lit room.

Enter the temple. Try to visualize all the data recently assimilated on evolution in a rational sequence of causality. Maintain this visualization with what spontaneity you can muster while listening to the Individuator's Speech. Try to simultaneously visualize yourself as the Individuator describes himself.

Individuator's Speech:

I began

a black egg

in a formless void

dots

shifting about

bumping into spots

I vibrated into

density

most often,

smallness least often.

I jumped ahead

into a cell

mingling with other selves.

I recall

birth unto reproduction

birth unto reproduction

Focus on a feeling of love connecting your purpose to that of mother nature. Feel conjoined to the history of human evolution. Meditate on moving into the memories of evolution the DNA spiral contains.
